CHECK SERVICES

Easy, convenient and secure check acceptance

Process checks as easily and safely as credit cards by converting a paper check into an electronic transaction. Processing a check through ACH into the appropriate account allows for similar security and convenience to that of a credit card transaction.

- Check Guarantee, included with check conversion, boasts 48-hour funding and means no bounced checks or NSF fees, even if the check is bad.
- All check programs include free web-based reporting for transaction details and account reconciliation.
- With electronic deposits, there is no need for daily trips to deposit checks.
- Using the Virtual Terminal check option, checks are processed electronically with payment data entered directly at the time of purchase.
