

# CLOVER KITCHEN DISPLAY SYSTEM

Improve the dining experience  
*while increasing kitchen efficiency*

The Clover Kitchen Display System (KDS) consolidates in-house, online, and third-party orders into one user-friendly solution designed for food-service teams.

Kitchen Display System provides a *real-time* view of

- ✓ ticket times
- ✓ order statuses
- ✓ in-house, online, and third-party orders
- ✓ prep times and fulfillment reports

- The KDS improves service speed without sacrificing precision or order accuracy.
- The hardware is purpose-built for food service and kitchen environments, with a temperature-resistant design that withstands heat up to 122°F.
- Orders are sent to your kitchen printer or appear on the optional Clover Kitchen Display System, just like orders placed at the counter.
- The KDS features anti-fingerprint and anti-glare coatings for easy cleaning and clear visibility, plus bi-directional speakers that ensure alerts are heard even in the noisiest kitchens.
- The KDS offers multiple screen sizes, an optional bump bar, and the flexibility to mount overhead or place on a countertop, making it easy to fit into any kitchen workflow.
