MX MERCHANT

Accept payments, manage billing, track sales and engage customers

MX Merchant is a dynamic payments ecosystem that streamlines your workflows and effectively manages all critical aspects of running a business.

It's not just a gateway...or just a dashboard...or just a way to view your account activity.

Instead, MX Merchant is a powerful payment and business management platform.

- Process payments anywhere — including credit cards, cash and/or checks in one transaction — directly from your MX Merchant account.

- View daily payments in real-time or break down payments to see what's most popular over time.

- Spot spending trends and track your customer base.

- Comprehensive reports on deposits, settlements, chargebacks, billing and monthly merchant statements.

- Customize your experience and create the perfect solution with add-on apps, including ACH, Invoicing, Business Analytics, Inventory Management and more.

Additional fees may apply for some services.
