

INVOICE CLOUD

A simple invoice and payment solution for municipalities

Municipalities can give residents or customers a simple, secure way to receive statements and a convenient way to pay and track their bills online. Bills are delivered faster, cheaper and more securely.

- Payment information (echeck, ACH or credit card) is entered directly into Invoice Cloud's PCI compliant system, eliminating the need for municipalities to store information on servers.
- Customers receive an invoice identical to their current paper invoice and access to a custom branded payment portal.
- Billers and customers can easily access payment history through a searchable database and billers have access to multiple reporting features.
- Municipalities can accept online credit card payments and, if preferred, pass the cost of doing so onto the customer.
